Longtime Volunteer’s Family Supports HMH Foundation

HMH recently lost a dear friend. Renata Reever dedicated thousands of hours volunteering for the HMH Auxiliary. When she passed away earlier this year, her family identified the HMH Foundation as the recipient of memorial gifts. What a beautiful way for them to honor Renata’s giving spirit.

Meet Henry

Henry is the first child of Elizabethtown residents Elizabeth and Jason Waters. Born last year, Henry needed extra care upon arrival. Fortunately, he received that care close to home at HMH. Thanks to support from the new HMH Foundation and its donors, HMH now offers families and babies like Henry, 24/7 neonatologists and the region’s only Level II Neonatal Intensive Care Unit (NICU).

“I’m so grateful for the work of the HMH Foundation. This NICU gives peace of mind to all parents.”

– Elizabeth DuPlessis Waters

Tracee Troutt, HMH Chief Marketing and Development Officer, presents the 2016 Litzenberger Scholarship to Sierra Holt, an HMH licensed practical nurse. Dr. Litzenberger’s last gift to the Foundation helps fund nursing education each year.

Message from the Chairman

As a young boy in the 1950s, I
would ride my bike past the
construction site of Hardin
Memorial Hospital. That 81-bed
hospital is now a comprehensive
healthcare system serving 400,000
people across Central Kentucky.
The HMH Foundation invests in
breakthrough initiatives to keep
HMH strong. In our first year we
raised nearly $500,000 for the
NICU. With news of two new grants
already this year, we are off to a
tremendous start!

My family and I have called Central
Kentucky home for decades. I couldn't
imagine living anywhere else. Making
sound investments that contribute
to our region's economic growth and
prosperity is paramount. That's why I
serve on the HMH Foundation Board
and am one of its Founding Investors.
- Carl Swope, Swope Family Dealership

HMHF Receives First National Grant

The HMH Foundation received a $50,000 grant from Brave Beginnings
to purchase new NICU equipment—a cardiorespiratory monitor that
allows the staff to observe all NICU babies at once and also a vein
viewer that allows neonatologists to see infants' tiny veins more
clearly. HMH is the first recipient in Kentucky and one of only 78 hospitals across the country to receive a Brave
Beginnings grant. Brave Beginnings is a program of the Will Rogers Motion Picture Pioneers Foundation.

When I woke up, all I wanted to do
was see my baby. Because Hardin
Memorial has this NICU, I could see
him right away.
- Wynna Bryant

Why HMH Matters

My family and I have called Central
Kentucky home for decades. I couldn't
imagine living anywhere else. Making
sound investments that contribute
to our region's economic growth and
prosperity is paramount. That's why I
serve on the HMH Foundation Board
and am one of its Founding Investors.

When people think of HMH, they likely
think of personal health. I challenge
you to think of economic health too.
HMH is vital to our region's economy.
Just look below at the impact HMH
has across Central Kentucky.
